UKS Venture presentation

Serina Erfjord

December 2nd at 7pm

In the beginning of the year we invited [Serina Erfjord](#) within the loose frames of a boundless collaborative venture where we supported her with a spatial and logistic free zone.

She had total freedom to develop anything but an exhibition. Within this framework she has tried out a large-scale prototype for an enterable intervention in one of the smaller rooms of UKS. With amazing effort she has now, during a four week long period materialised a research project with architectonic dimensions.

The project will be presented only this evening and we will take the opportunity to serve strong and hot drinks and some home baked pastry to salute the winter, foreshadow the upcoming holidays and say goodbye to a very exiting and intense year.
